Achieve Smooth, Beautiful Skin

GentleLase Pro™ is the next step in laser-based hair removal and skin care. Harnessing the power of laser energy, GentleLase Pro penetrates the hair follicle, destroying it at its root while preserving the surrounding skin. GentleLase Pro also works effectively and safely to provide a non-invasive treatment for cosmetic to dermatologic skin conditions such as sun-damaged skin, age spots and freckles.

Experience:

- Smoother skin, free of unwanted hair
- Freedom from sun-damaged skin, age spots and freckles
- Minimal discomfort, minimal downtime

What does the GentleLase Pro treatment feel like?

Laser energy is delivered through a small handpiece, and that energy is absorbed by the skin and converted to heat. Your skin may be pink immediately following the procedure; typically, this lasts from a few minutes to several hours after the procedure.

Are the treatments painful?

The GentleLase Pro system uses a patented Dynamic Cooling Device™ (DCD™), which prepares the skin for treatment by spraying the upper layers with a cooling burst of cryogen in adjustable durations—milliseconds before and after the laser pulse. DCD helps ensure that GentleLase Pro treatments are as comfortable as they are effective.

What precautions should I take throughout this process?

Avoid sun exposure for at least two weeks before treatment. Do not bleach, pluck or wax 4 to 6 weeks before and after treatment. Wait until your tan fades before beginning treatment.

How long do GentleLase Pro treatments take, and how many treatments will I require?

Treatment times may vary depending on your specific needs, but treatments can usually be performed in under an hour. Discuss your specific needs with your practitioner to determine how many treatments you'll require.

Are GentleLase Pro treatments safe, and are there any side effects?

Laser and light-based treatments have been safely used for many years for a variety of medical and cosmetic procedures. All treatment results are individual, but most procedures have a low risk of adverse side effects. In rare cases, some patients experience pigment changes that generally vanish over time.

Are GentleLase Pro treatments covered by insurance?

Most insurance companies do not offer reimbursement for cosmetic procedures. Please consult your insurance carrier for details.

How much do treatments cost?

Treatment cost depends on the area and condition being treated. Discuss your personal needs with your practitioner to learn more.
